Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

BUSINESS CORRESPONDENCE should be addressed to the Secretary-Treasurer of the Association, W. D. Cairnes, 27 King Street, Oberlin, Ohio.

WHY

THE HAWKES-LUBY-TOUTON ALGEBRAS

Have Been Successful

They fix one algebraic idea in the pupil's mind before a new one is introduced.

They make the subject really interesting and help through their portraits and historical notes to bring out the human side of the subject.

They give pupils a firm grasp of the processes of algebra.

They introduce the equation early and frequently.

They develop factoring gradually.

They furnish the pupil systematically with methods of checking results.

They grade exercises and problems carefully, and correlate algebra with arithmetic, geometry, and physics.
